

### OPTIONAL STANDPIPE FOR 5/8-INCH-DIAMETER SPRINKLER METER

Central Arkansas Water can install a simple standpipe, with one faucet for a garden hose connection, at the time of installation of a 5/8-inch-diameter water meter. The cost of this option is \$65.00, in addition to the normal connection fee. All regular Central Arkansas Water's requirements applicable to sprinkler meters must be satisfied, as a condition of service. The contract must be signed and all fees paid before the sprinkler standpipe is installed. The standpipe must be ordered at the time the new service is ordered.

The sprinkler standpipe is the only plumbing option offered by Central Arkansas Water on sprinkler meters. Central Arkansas Water will not alter the standpipe in any way. A customer who desires an alteration to the standpipe or a more complex system than the standpipe will need to make arrangements for the installation. The sprinkler standpipe does not require a plumbing permit or inspection. Any system that is more complex than the sprinkler standpipe attached to a 5/8-inch-diameter meter will require a permit and inspection. (See contacts for plumbing permits listed below).

The standpipe is an option **purchased** by the customer. The standpipe becomes the property of the customer immediately after it is installed and all liability and maintenance related to the standpipe are the responsibility of the customer.

I understand and agree to the this AMENDMENT to the standard Central Arkansas Water WATER SERVICE CONTRACT for the following premise:

**APPLICANT:**

<hr/>	
Print Name	Service Address:
<hr/>	
Signature	Date

**Contacts for Plumbing Permits if installation is altered in the future:**
